## Statement of the global campaign to return to Palestine

### In response to the designation of the "Samidoun" network as a terrorist organization

It is not surprising that the resistance and honorable are accused of terrorism by criminals against humanity, nor that the Zionist Ministry of War classifies "Samidoun" as an enemy terrorist organization, especially after the continuous successes of the "Samidoun" network in exposing the true terrorist face of the occupation and stripping it of false masks - such as democracy and others - Worn in front of the people of the world.

This decision, which is not separate from the occupation's oppressive policies against the captive national movement, comes in the context of a broader move that the occupation undertakes, with the help of the Zionist lobby in the West, against the international solidarity forces that support the struggle of the Palestinian people and their legitimate rights, and among the manifestations of that campaign waged by extremist organizations in Canada Since last February, including the "Center for Israel and Jewish Affairs" known as the "Jewish Congress", to compel the Canadian government to place "Samidoun Palestinian Prisoner Solidarity Network" on the terror lists.

Considering that solidarity with "Samidoun" is an obvious matter and one of the basics of solidarity with the free prisoners and with the general Palestinian people, the Global Campaign to Return to Palestine calls on all organizations, institutions and associations supporting the Palestinian right to further coordinate efforts to confront the Zionist criminal entity, especially with the waves of sinful normalization, And decisions hostile to Palestinian content on the Internet and social media platforms, and media campaigns that promote Zionist lies.

We congratulate "Samidoun" for this medal, and we are certain that it will increase in determination and steadfastness as long as the steadfastness of the free people remains and their adherence to their cause despite any restrictions.

The global campaign to return to Palestine.
